Curriculum & Resource Dossier

Grade 6 Mathematics · SY 2026–2027

Compiled reference for teachers, school heads, and curriculum planners

1. What is the MATATAG Curriculum?

MATATAG (a Filipino word meaning “sturdy / resilient”) is the Department of Education’s recalibration of the K–10 Basic Education Program, launched on **10 August 2023**. It decongests the old K–12 curriculum, sharpens focus on foundational skills (literacy and numeracy), and strengthens values and 21st-century competencies. It is rolled out in phases:

School Year	Grades implementing MATATAG
2024–2025	Kindergarten, Grade 1, Grade 4, Grade 7
2025–2026	Grade 2, Grade 5, Grade 8
2026–2027	Grade 3, Grade 6, Grade 9
2027–2028	Grade 10 (full K–10 coverage)

WHY THIS MATTERS FOR GRADE 6

Grade 6 enters the MATATAG curriculum in **SY 2026–2027**. Teachers are expected to use MATATAG-aligned *Lesson Exemplars* and the three-term *Budget of Work* — not the old MELC-based DLL format. Assessment also shifts from four quarters to **three terms (trimesters)**.

2. The Grade 6 Mathematics Framework

MATATAG Mathematics is built on **three content domains** (replacing the older five strands), wrapped by the **Big Ideas** of the discipline and developed through the **mathematical skills and processes** (communicating, reasoning, representing, connecting, modelling, problem-solving). Grade 6 is the final year of **Key Stage 2 (Grades 4–6)**.

Code	Content Domain	Focus at Grade 6
NA	Number & Algebra	Decimals, fractions, ratio & proportion, percentages, exponents & GEMDAS, GCF & LCM
MG	Measurement & Geometry	Angles, tessellation, transformations, volume & capacity, plane figures, circles, area & perimeter
DP	Data & Probability	Pie graphs, data interpretation, measures of central tendency, simple experimental probability

3. Full Grade 6 Competency Map (by Term & Domain)

Competency codes follow the DepEd pattern **6<Domain>-<Term><week>-<n>** (e.g. **6NA-Ia-1**). Codes below are aligned to the official Mathematics Curriculum Guide and the three-term Budget of Work; confirm exact week placement against your division's released BOW.

Term 1 — Number & Algebra (with intro to Geometry)

Domain	Learning Competency	Code
NA	Performs the four fundamental operations on decimals	6NA-Ia-1
NA	Solves multi-step routine and non-routine problems involving decimals	6NA-Ib-2
NA	Adds and subtracts fractions and mixed numbers	6NA-Ic-3
NA	Multiplies and divides fractions, whole and mixed numbers	6NA-Id-4
NA	Finds the GCF and LCM of two–three numbers; applies to problems	6NA-Ie-5
NA	Reads/writes numbers in exponential form; evaluates using GEMDAS	6NA-If-6
MG	Identifies shapes that tessellate; creates tessellation patterns (Filipino designs)	6MG-Ig-7

Term 2 — Number & Algebra & Measurement & Geometry

Domain	Learning Competency	Code
NA	Expresses and simplifies ratios; finds missing terms in a proportion	6NA-IIa-1
NA	Solves problems involving direct and partitive proportion	6NA-IIb-2
NA	Relates percentage to fractions and decimals; finds percentage, rate, base	6NA-IIc-3
NA	Solves percent problems: discount, commission, sales tax, simple interest	6NA-IId-4
MG	Classifies and measures right, acute, and obtuse angles	6MG-IIe-5
MG	Describes figures after translation, reflection, and rotation	6MG-IIf-6
MG	Converts units of volume/capacity; finds volume of cubes and rectangular prisms	6MG-IIg-7

Term 3 — Measurement & Geometry and Data & Probability

Domain	Learning Competency	Code
MG	Describes properties of triangles and quadrilaterals	6MG-IIIa-1
MG	Finds perimeter and area of triangles, parallelograms, and trapezoids	6MG-IIIb-2
MG	Identifies parts of a circle; finds circumference	6MG-IIIc-3
MG	Finds the area of a circle and of composite figures	6MG-IIId-4
DP	Constructs and interprets pie graphs and other data displays	6DP-IIIf-5
DP	Calculates and interprets mean, median, and mode of a data set	6DP-IIIf-6
DP	Describes and computes simple experimental probability of events	6DP-IIIf-7

4. Suggested Time Allotment

Component	Allotment
Mathematics daily class	50 minutes/day, 5 days/week
Each term	~10–12 teaching weeks
Per competency cluster	1–2 weeks (5–10 sessions)
Term assessment week	1 week (review + term exam) at end of each term

HOW TO USE THIS DOSSIER WITH THE REST OF THIS PACKAGE

This dossier is the reference layer. The accompanying **Term 1–3 packages** provide ready-to-use *lesson plans* (MATATAG Lesson Exemplar / 4 A's format), *activity sheets*, *quizzes with answer keys*, and *term exams with tables of specifications*, followed by a cumulative *Year-End Examination*.
